BUS RULES
MONITORING STUDENT BEHAVIOR ON A SCHOOL BUS

To monitor student behavior on specific school buses, an Audio/Video Security system equipped with video tape or digital camera recording system will be used. The system will be implemented using the following guidelines:

a. The District will have the video tape or digital camera recording system with audio capability installed in compliance with State and Federal laws.

b. A produced videotape or digital recording will be kept on file in the Transportation Department or a Building's office for a minimum of forty-eight (48) hours. If it is determined that a specific videotape or digital recording contains information that may be needed to resolve a safety and/or discipline problem, the videotape or digital recording may be kept for a longer period of time.

c. A produced video tape or digital recording may be used by District personnel to conference with those individuals whose inappropriate behavior are depicted on a videotape or digital recording for their parents/guardians and/or law enforcement officials.
