

PHILOSOPHY OF THE DISTRICT

1           The philosophy of the District is that schools should be focused on improving           1  
2           student achievement. To this end, District personnel will follow the concepts           2  
3           expressed in the District's Foundation Documents (Vision, Mission, Beliefs, and           3  
4           Values). The District's goals, curriculum, and assessments will be guided by the           4  
5           foundation documents.           5  
6           The District believes that for each individual to reach their maximum potential that           6  
7           the focus must be on the development of the whole individual. The foundation           7  
8           documents must support this belief.           8
