

PHILOSOPHY OF THE DISTRICT

The philosophy of the District is that schools should be focused on improving student achievement. To this end, District personnel will follow the concepts expressed in the District's Foundation Documents (Vision, Mission, Beliefs, and Values). The District's goals, curriculum, and assessments will be guided by the foundation documents.

The District believes that for each individual to reach their maximum potential that the focus must be on the development of the whole individual. The foundation documents must support this belief.
