

POLICY: 800.3

BUILDINGS AND GROUNDS SAFETY INSPECTION

An annual, comprehensive safety inspection of each building and its grounds shall be completed by the Director of Buildings and Grounds in cooperation with the person(s) directly responsible. The inspection shall focus on safety and health hazards that may be a source of possible injury to students, staff, and school visitors. District employees shall be encouraged to identify in writing and verbally unsafe conditions that exist or may develop during the school year. When such a condition occurs/exists that negatively affects the learning environment or the safety and welfare of people in a District building, the staff member(s) shall immediately do what he/she reasonably and competently can do to correct the condition. If he/she is unable to correct or control the condition(s), the person shall immediately inform a Building Administrator who will in turn immediately notify the District's Buildings and Grounds Department. The results of this inspection will be reported to the Board at its Annual Meeting.
