

POLICY: 800.5

BUILDINGS AND GROUNDS PROTECTION

Protection of the District's investment in its buildings and grounds is imperative. The District will make every effort to adequately protect these investments.

Security means not only maintenance of a secure, locked facility but also protection from fire hazards, faulty equipment, and unsafe practices in the use of electrical, plumbing, and heating equipment. The District encourages close cooperation with local police, fire, and sheriff's departments and with insurance company inspectors. Protective devices that are designed to be used as safeguards against illegal entry and vandalism may be installed where appropriate. Employment of security personnel may be approved where special risks are involved.

Records and funds regarding protection of the buildings and grounds shall be kept in a safe place and under lock and key where required.
